00 PROFILE

I design products people use to get work done: ERPs, government platforms and mobile apps. Since 2020 I have shipped 20+ products, including SEC's industrial-security ERP, and most recently designed a radiology ERP for hospitals. I build *the system before the screens*: tokens that match the developers' components, and flows tested with the people who will use them. I studied civil engineering, so structure and clear handoff come naturally.

Rehabitaire — Senior UI/UX Designer

rehabitaire.com

- Designed and analysed a **full radiology ERP** with the product owner: managing radiologists and their studies, and delivering results to client sites such as hospitals.
- Ran **usability tests and sessions with real users and stakeholders**, and turned what we learned into design changes.
- Handed the designs to the development team and supported them through the build toward release.

06/2025 - 06/2026

Remote

Digital Wink LTD — Senior UI/UX Specialist

- Redesigned modules of **SOS, the Saudi Electricity Company's industrial-security ERP**: visitor permits, gate logs, inspector permissions and warehouses. In use at SEC power stations.
- Helped move the product from Material Design to **its own design system mapped to Angular Material**, then re-themed it for SEC's new brand with a team of designers.
- Designed large-scale government systems, built a design system for a full government platform, and redesigned legacy admin workflows.

Te-rex — Senior UI/UX Designer

te-rex.com

- Designed **mobile apps for delivery, food ordering and digital wallets**, from user flows to final UI.
- Redesigned outdated client websites and designed new landing pages, turning business goals into clear, usable pages.

01/2025 - 06/2025

Remote

Darrebni — Senior UI/UX Designer

darrebni.net

- **Led the UI/UX team** on a government digital-transformation platform serving **12+ government departments**.
- Owned design strategy and execution, and kept one consistent system across web and mobile.
- Designed citizen-facing flows that move complex state services online.
